

Strategic 360° Cloud analysis for SimCorp Dimension

OUR ASSIGNMENT

In today's competitive IT landscape, businesses increasingly embrace cloud-based IT solutions. In this analysis, we closely examined our client's existing on-premise model for running SimCorp Dimension. We evaluated the operating model against various alternatives, considering factors like service quality, total cost of ownership, and alignment with business and IT strategies.

Collaborating with the client, we defined and validated potential future scenarios for SimCorp Dimension operating model. The outcome was an unbiased recommendation tailored to the client's unique needs, backed by a comprehensive 360° decision-making process.

Approach and Tools	Value Realization	aietes Expertise
 <ul style="list-style-type: none">• 360-degree analysis of economic, technical, and organizational aspects, including detailed evaluations of Cloud Service Models and the Cloud migration• Structured approach to ensure that the client's individual situation has been fully evaluated• Sound requirement analysis• Detailed cloud costs projections, including worst-case and best-case scenarios	 <ul style="list-style-type: none">• Solid basis for his decision to move to the SimCorp cloud, providing confidence for the decision-making process• SaaS scenario calculator with a clear projection of their future cloud configuration and costs• Identification of the best solution for the target operating model, including the upcoming changes and challenges for the client's organization	 <ul style="list-style-type: none">• In-Depth knowledge of SimCorp Dimension• Target operating model development• Requirements assessment• Cloud costs scenario analysis (Best-Case, Worst-Case) & TCO projection• Cloud & IT Management knowledge• Strategic business case development
